Subject: RE: Title V Permit Renewal -Notification/ Holston Army Ammunition Plant

Hi Moe,

Thank you for your information. However, I would like to challenge the statement that "it is a confidential document from the Army."

In accordance with TDEC 1200-3-4-.04(1)(h) an exception to open burning may be approved where "there is no other practical, safe, and/or lawful method of disposal. Documentation demonstrating why the general open burning regulations cannot be met must be submitted." TDEC 1200-3-4-.04(1)(k) also states that "Open burning conducted under this exception is only allowed where no other safe means of disposal exists." Furthermore TDEC 1200-3-4-.04 (2) states "The Technical Secretary reserves the right to require a person to cease or limit open burning if emissions from the fires are deemed by the Technical Secretary or his designee to jeopardize public health or welfare, create a public nuisance or safety hazard, create a potential safety hazard, or interfere with the attainment or maintenance of the air quality standards."

With the TDEC Rules, the document of the Army should be in support of the exceptions allowed in the Rules. If the Army wants to assert "Confidential Business Information" status upon submittal, we can examine the information to see if the confidential standards apply. If you have other information associated with Holston in support of the exceptions in the Rules, please send me a copy of that information.

Holston is one of many facilities that the EPA is looking at because of open burning. The EPA's Explosive Alternatives Disposal Team's mission is to "Explore ways to better manage certain explosive wastes and reduce contamination from open burning and open detonation operations."

Thank-you in assisting me with this information!
Terri Crosby-Vega

I do not have it. I just spoke with Jimmy Ogle from HAAP. He said "it is confidential document from Army ". He will respond to me after he talk to them.

Thanks
Moe Baghernejad

I was wondering if you have a copy of the following document. Do you know if it was sent to EPA? I am looking for a copy of the document. Any information that you have would be helpful.

"Alternative Treatment Options for Open Burning of Explosive Waste at Holston Army Ammunition Plant, (ERDC/EL TR-12-8), March 2012."

Thanks!
Terri

Ken,

I will raise this comment. I have a few things in front of this one, but I'll send out my draft comments once I have everything all together.

Eva,

Is it still your intent to seek the addition of a specific prohibition on the open burning of PCBs in the new permits?

Hello Again,

There are apparently two title V permits for this facility. The two permits are in different counties. If you have any comments please let me know by 6/17 on this one as well.

Thanks for your help.

Eva

“Concurrent Review Requested”

Dear Ms. Land:

Enclosed for your information is a copy of the Division's draft major source (Title V) operating permit renewal, the public notice and statement of basis for:

Holston Army Ammunition Plant
BAE Systems Ordnance Systems Inc.
4509 West Stone Drive
Kingsport, TN 37660

This notice was placed in the legal section of the Kingsport Times-News on May 18, 2016. You are invited to review and comment. You agreed to treat this draft permit as a proposed permit and to perform your 45-day review concurrently with the Public Notice period.

If you have any questions or comments concerning this source, please contact Moe Baghernejad at (615)532-0594 or via email at moe.baghernejad@tn.gov.

Thanks

Moe Baghernejad
